

Julie ZILBERBERG

42 bd de Balmont, 69009 Lyon

zilberbergjulie@gmail.com | github.com/juliegbbz | [Portfolio](#)

Seeking a 6-month end-of-studies internship starting mid-February 2027

Education

POLYTECH Nancy

Nancy, France

Specialization: Computer Science, Automation, Robotics, and Networks (IA2R)

2022 – Present

- **Track:** Information Systems and Networks (SIR)
- **Graduation:** September 2027

Professional Experience

iQanto

Valence / Lyon, France

Assistant Engineer Intern

June 2026 – August 2026

- Requirements analysis and documentation review for industrial IT & cybersecurity projects (Chronopost, SNCF Gares & Connexions, TotalEnergies).
- Cybersecurity risk assessment of an industrial IoT/LoRaWAN solution following ANSSI methodologies and recommendations.
- Analysis of security requirements, identification of compliance gaps, and proposals for corrective measures.
- Presentation of results and recommendations to stakeholders; contributed to cybersecurity reporting.

AVEC Association

Nancy, France

Volunteer

2024 – 2025

- Provided homework help and academic support to children from underprivileged neighborhoods.

Projects

Chessmate - Chess Puzzle Platform | [GitHub Link](#)

2026

- Developed a full-stack application with a Spring Boot REST API integrating Lichess to generate puzzles (FEN/PGN parsing, themes/ranking).
- Designed an interactive frontend using Thymeleaf and JavaScript: dynamic chessboard, scoring system, and user session management.
- Deployed the website on chessmateul.fr.
- Managed the GitLab repository, Maven dependencies (JSON parsing), and database persistence.

Minishell - UNIX Command Interpreter | [GitHub Link](#)

2026

- Developed an interactive command interpreter in C compliant with POSIX standards.
- Managed process creation (fork/exec), pipelines, and standard input/output redirections.
- Implemented signal handling (Ctrl-C) and built-in commands such as `cd` and `exit`.

Wifibot - Robotic Control Interface | [GitHub Link](#)

2025

- Designed a GUI in C++/Qt to control a WiFi robot via TCP/UDP communications.
- Integrated sensors (infrared, encoders) and motor control.

Skills

Languages: English (C1 Level, TOEIC), Spanish (B1 Level)

Programming Languages: C/C++, Java, Python, JavaScript, LaTeX

Frameworks & Tools: Spring Boot, Thymeleaf, Qt

Networking & Technologies: TCP/UDP, IoT/LoRaWAN, UNIX Systems, Wireshark, Cisco Packet Tracer

Tools & Platforms: Linux, Git, Docker, VS Code, MySQL, MS Azure

Governance, Risk & Compliance (GRC): Risk Analysis (EBIOS), ANSSI Compliance

Extracurricular Activities

Swimming: Regular practice for 14 years. Participated in the French University Championships.

Sewing: Recreational practice.
