ACADEMIC PROJECTS

2026 Chessmate Chess Puzzle Platform <https://github.com/juliegbblz/Chessmate>

- Built full-stack app with Spring Boot REST API integrating Lichess for infinite puzzles (FEN/PGN parsing, themes/ratings).
- Designed Thymeleaf/JS frontend for interactive chessboard, scoring, and user sessions; deployed on <https://chessmateul.fr/>.
- Managed GitLab repo, Maven deps (JSON parsing), DB persistence—handled debugging/deployment challenges.

2025 Wifibot Robot Control GUI <https://github.com/juliegbblz/Wifibot>

- Engineered C++/Qt GUI for WiFi robot piloting: TCP/UDP comms, sensor integration (IR, encoders), motor control.
- Demonstrated embedded systems, networking, and UI skills for robotics/automation roles.

2025 Nuclear Quiz - Partnership with EDF <https://github.com/juliegbblz/EDF>

- Built the web component using JavaScript, HTML, and CSS, creating an interactive digital layer for the quiz.
- Implemented backend functionality with Node.js to handle game logic.
- Learned and applied secure web deployment practices, successfully hosting the site on the internet with proper security measures.

LANGUAGES

- English : C1 level (TOEIC)
- Spanish : B1 level
